Others SEO, Accessibility, CI/CD, Agile Methodologies, Git, Remote Collaboration, Problem-Solving

Experience

GreedyGame Jan 2023– Sep 2024
Frontend Developer

- Engineered Offerwall using Next.js 13 and TailwindCSS, surpassing revenue targets by 10x (\$1000/day vs. \$100/day) within the first month, while serving millions of users.
- Developed interactive dashboards using React, Redux, Recharts, reducing user interaction time by 40% and increasing engagement by 15%.
- Boosted site performance by 30% through advanced state management and code-splitting techniques, improving load speeds and responsiveness.
- Optimized pubscale.com and greedygame.com with server-side rendering and SEO best practices, driving a 25% uptick in user engagement.
- Built reusable UI libraries, accelerating future project development by 35%.

GreedyGame Oct 2022 – Jan 2023
Frontend Developer Intern

- Elevated organic traffic and search rankings by applying schema markup and SEO enhancements to core business websites.
- Produced high-converting landing pages with React.js and TailwindCSS, achieving a 25% rise in product sales and a 15% increase in user engagement.

Education

IIIT Basar University 2018 – 2022
B.Tech in Computer Science Engineering – 8.2/10

Projects

Dashboard (Next.js, React Table, Shadcn-UI, Supabase) Aug 2023 – Sep 2023

- Implemented role-based access control, secure RLS policies, and searchable tables to streamline business workflows and data management.
- Integrated interactive analytics and forms, enhancing user experience and reducing operational overhead.
- *GitHub*: https://github.com/abdulsami822/ambits_admin

Betoppers Business Website (Next.js, TailwindCSS) Sep 2024

- Created a fully responsive frontend with optimized SEO strategies, leading to a 20% rise in potential leads and a 15% increase in orders.
- Integrated custom UI design, improving user interaction by 30% and reducing bounce rates by 25%.
- Utilized Next.js server components for performance enhancements, reducing page load times and elevating user satisfaction.

Election Application (React.js, MongoDB, Razorpay SDK) Sep 2021 – Oct 2021

- Built a secure online voting platform, integrating payment solutions and authentication mechanisms.
- Successfully handled user registrations and voting transactions with high reliability and efficiency.
- *GitHub*: <https://github.com/rashid3011/ovs-frontend.git>
